PROFESSIONAL SUMMARY

Multidisciplinary creative technologist and software developer with a strong foundation in **C/C++, C#, web development, game development, and motion design**. Experienced in building and shipping SaaS products, interactive interfaces, automation systems, and visual content from concept through deployment. Advanced in Adobe After Effects and comfortable bridging design and engineering using Figma, Blender, Rive, Unity, Godot, React/Next.js, APIs, databases, and AI-assisted development tools including Claude Code and Codex. Based in Morocco and fully open to relocating to Canada to build a long-term career.

CORE SKILLS

Software Engineering: C, C++, C#, Python, JavaScript, TypeScript, algorithms, OOP, memory management, debugging, system design
Web & App Development: React, Next.js, Node.js, Express.js, .NET, HTML5, CSS3, Tailwind CSS, REST APIs, SQL, Supabase, authentication
Game & Interactive Development: Unity, Godot, C#, gameplay systems, VR prototypes, interactive production and automation logic
Motion & Visual Design: Adobe After Effects, Premiere Pro, Figma, Rive, Lottie, Blender 3D, UI motion, product videos, visual effects
AI-Assisted Development: Claude Code, Codex, OpenAI, Anthropic SDK, prompt-driven prototyping, model integrations, AI-assisted debugging and iteration
Delivery & Platforms: Git, GitHub, Vercel, Stripe, PayPal, Supabase Postgres, deployment, product iteration

PROFESSIONAL EXPERIENCE

Creative Technologist, UI & Motion Designer | OMC, Inc. / TaskMaverick | Remote

Mar 2025 - Present

- Design and ship SaaS interfaces, product flows, UI motion systems, tutorials, product videos, and marketing assets using Figma and Adobe tools.
- Collaborate with product and engineering teams on feature implementation, front-end work, backend integrations, and maintenance of taskmaverick.com.
- Bridge design and engineering by combining motion systems, UI implementation, web development, backend integration, 3D, and software-engineering fundamentals.

Lead Motion Designer | Association of Islamic Charitable Projects | Remote

Mar 2024 - Sep 2024

- Delivered 50+ motion design projects including UI animation, storyboards, campaign videos, visual effects, and final production.
- Created motion graphics and interface animations using After Effects, Rive, Figma, and related production tools while maintaining consistent quality across multiple projects.

Video Editor & Motion Designer | Freelance | Remote

Sep 2020 - Present

- Manage projects from brief to delivery, combining video editing, motion design, 3D work, client feedback, and deadline ownership.
- Create product-focused visual communication for software teams, including launch assets, workflow explanations, promotional videos, and interface motion.

Software Engineer Intern | IntellCap SARL | Rabat, Morocco

Apr 2022 - Jul 2022

- Contributed to an e-learning platform using .NET, designed interface structures in Figma, and built an interactive VR gallery with Unity and C#.

SELECTED SOFTWARE & PRODUCT WORK

Vidmo / Browser-Native Motion Product | Creator & Software Engineer

Current

- Built a browser-native motion design and video editing product with an editable timeline, keyframes, live canvas rendering, scripting, audio tools, and multiple export formats.
- Integrated AI generation workflows, Claude-based reasoning, and voiceover tools to turn prompts or product pages into editable video projects.

ImagePrompting | Full-Stack Developer

Current

- Built an image-to-prompt SaaS using Next.js, TypeScript, Supabase authentication, usage credits, Stripe checkout, server-side AI generation, Anthropic/OpenAI SDKs, moderation, and payment webhooks.

- TailorResumeAI** | Full-Stack Developer 2025 - Present
 - Built and deployed an AI resume-tailoring SaaS with React, Node.js, Express.js, Supabase, PayPal, and Vercel, including file processing, AI rewriting, editing, and document output.
- Enprico** | Co-Founder & Developer 2025 - Present
 - Co-founded a French-learning platform and built its production website and student experience with Next.js, React, Supabase, motion, and email integrations.
- DailyDeed** | React Native / Expo App Project
 - Built a TypeScript mobile application prototype with Expo Router, local storage, notifications, media selection, and cross-platform navigation.
- Voltic Factory Game** | Unity / C# Project
 - Developed gameplay and automation systems for a Unity factory game, including electrical connections, transport belts, machines, and interactive production flows.
- 42 Systems Projects** | C / C++ Academic + Personal
 - Completed C and C++ projects covering custom libraries, file reading, Unix signals, process communication, memory management, graphics, and object-oriented programming.

EDUCATION

- Software Engineering Program** | 1337 Coding School | Morocco 2022 - 2025
 - Advanced work in C, C++, algorithms, memory management, computer architecture, Unix systems, and system design. Reached level 8.67.
- Associate Degree in IT Development** | Institut Spécialisé de Technologie Appliquée | Morocco 2020 - 2022
 - Studied .NET, C#, Python, Java, algorithms, databases, and core software-development fundamentals.
